5th Non-Volatile Memories Workshop

La Jolla, California USA

March 9-11, 2014

<http://nvmw.ucsd.edu>

The 5th Annual Non-Volatile Memories Workshop (NVMW 2014) provides a unique showcase for outstanding research on solid state, non-volatile memories. It features a “vertically integrated” program that includes presentations on a wide range of topics spanning devices, data encoding, systems architecture, and applications:

- Big data applications for NVMs
- Flash-based SSD optimization
- Power management in NVMs
- Operating system optimizations
- SSD wear management
- Persistent objects
- Novel NVM array architectures
- Error coding for NVMs

The workshop program will include around 30 speakers from top universities, industrial research labs, and around the world.

Workshop information is available here <http://nvmw.ucsd.edu/>

Early registration ends February 28th.

Travel grant applications are due February 12th.
